# Hobby Attic Ladder

## 9 reasons why you should choose the Hobby for your attic or mezzanine access need ...

**Easy to open and close:** We know that not everyone has muscles like a weight lifter . . . the Hobby Attic Ladder is designed to be effortlessly opened using the rod and hook supplied, can be raised or lowered easily, and is self locking.

**Easy to install:** The Hobby is supplied fully assembled and ready for installation, and is accompanied by easy-to-follow instructions. Although we recommend that your Hobby Attic Ladder is installed by a qualified builder, an accomplished DIY person will have no difficulty. A convenient freephone Help-Desk number is provided below for installation guidance if required. Installation agents are also available throughout New Zealand.

**No permit required:** Install with confidence. Providing the stair is installed according to the instructions, there is no requirement for a building permit. It can be installed into either a ceiling or mezzanine.

**Guarantee of quality:** The Hobby Attic Ladder is manufactured from strong and durable spruce timber. The Hobby Attic Ladder comes with a guarantee on workmanship and materials for 10 years from date of purchase.

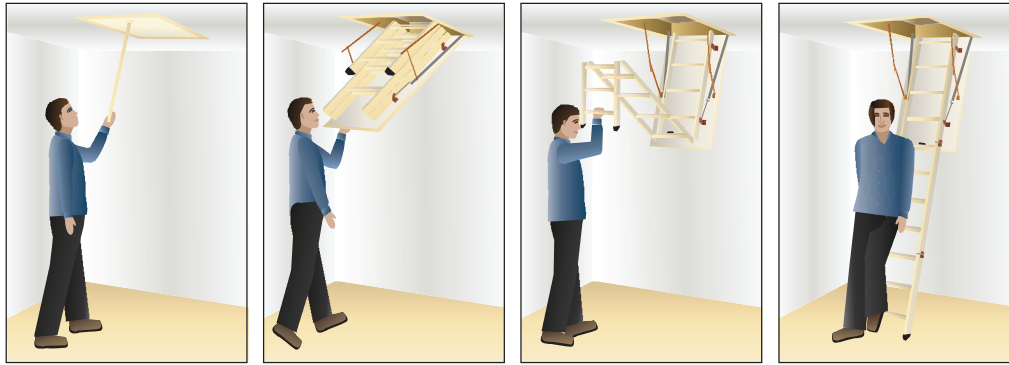

**No draughts or heat loss:** A rubber draught excluder is contained in the casing, preventing loss of heat and draughts. The casing and trapdoor have a rebate for extra tight closing. The trapdoor has a 20mm spruce frame, 20mm polystyrene insulation & white masonite plates both sides, and gives excellent insulation efficiency. The insulation coefficient is 1.22 W/m<sup>2</sup>°C

**Height adaptable:** Adaptable to floor-to-ceiling heights of up to 2830mm.

**No attic space wasted:** The ladder folds neatly into 3 sections and requires no headroom or storage space in the loft.

**No slipping:** All 12 treads have a non-slip surface for extra security.

**Robust:** The Hobby has been test loaded at 300kg, and is rated for a maximum safe working load of 150 kg.

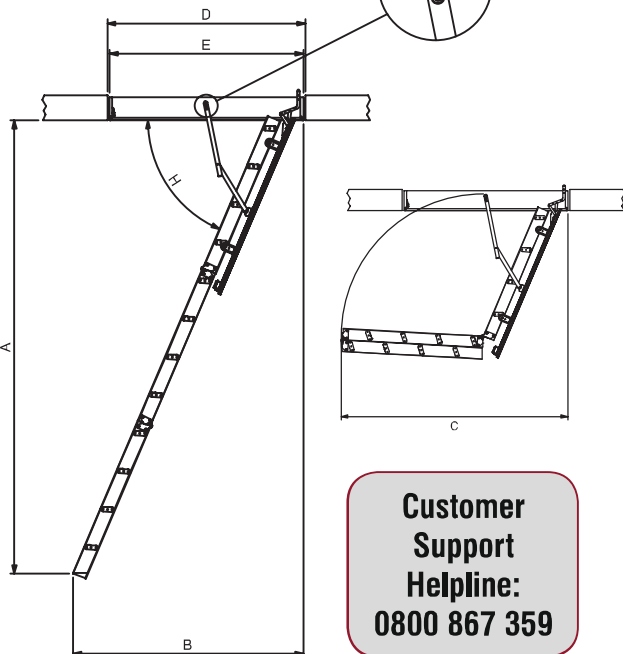

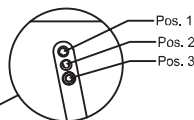

### DIMENSIONS

Casing size (E): 1175 x 576 mm  
 Opening size (D): 1200 x 600 mm  
 Floor to ceiling height (A): 2830 mm  
 Casing height: 115 mm  
 Number of treads: 12  
 Maximum landing space (B): 1400 mm  
 Maximum swing clearance (C): 1630 mm

Dimension G: 116 - 413mm  
 Dimension H: 67° - 71°  
 Dimension J: 328mm

### Casing

**Material:** Massive spruce  
**Thickness:** 18 mm  
**Height:** 115 mm

The lower edge of the casing is rebated and has a draught excluder, which ensures tight closing.

### Trapdoor

**Material:** 20 mm spruce frame, 20 mm insulation & white masonite plates both sides.

**Thickness:** 26 mm  
**Insulation:** 20 mm polystyrene  
**Insulation coefficient:** 1.22 W/m<sup>2</sup>°C

### Ladder

**Material:** Spruce  
**Width:** 400 mm  
**Distance between treads:** 250 mm

### Tread dimensions

**Thickness:** 28 mm  
**Depth:** 82 mm

### String dimensions

**Thickness:** 28 mm  
**Depth:** 84 mm

All treads have a non-slip surface and treads and strings are assembled with dowels.

Extension Kit reaches up to a height of 3.3m
